The President's Message

Our highly successful 1974 Convention closed with nothing but
ise from all concerned. A full report on the convention can be
nd elsewhere in this issue. Our sights are now set on 1975, and we are
eful that, by incorporating new programs and activities into our
wen format, that the future will bring even greater enjoyment to
se involved with N.A.S.C.

In the more immediate future, we are looking forward to a con-
uation of our highly successful work with member clubs, and for
t purpose, I have appointed Dr. Sol Taylor as Chairman of our
nber club activities for 1974-75. I feel certain that the professional
tivity which our president-elect brings to this post will find
.S.C.'s contribution to our member clubs even more beneficial
n in past years.

My personal committment to N.A.S.C. in the months preceeding
convention is directed toward our individual membership. For
s I have felt that N.A.S.C. has not devoted enough of its resources
ard its individual membership, and as a consequence, our personal
nbership is substantially below what it should be. I am dedicated
he proposition that N.A.S.C. should immediately implement pro-
ns for the benefit of the individual collector, and provide services
otherwise attainable through regular membership in one of our
nber clubs. At our next meeting of the Board of Governors on
ch 24, 1974, I will request immediate approval of programs to be
rtaken during the year for the benefit of our individual member-
. In this respect, I am hopeful that we will erase the image that we
nothing more than "an annual convention".

Any ideas which any of our individual members have regarding
N.A.S.C. activities are always welcome. I am pleased with the
usiasm shown by the many volunteers involved in our committee
ities to date, and we are looking forward to an exciting year.

Another successful convention; held February 7th - 10th, 1974 at the Los Angeles Hilton Hotel, Los Angeles, California; has been entered in the records of the Association.

ding numismatist of 1973. Murray was the only surprised person e banquet, as he accepted the award; from Ed Borgolte; he stated he had always felt the N.A.S.C. was a member of his family and efore very near and dear to him.

A. N. A. SUMMER SEMINAR

By Jim Zimmerman

"Congratulations! You're a winner." began the letter from the American Numismatic Association (A.N.A.) Headquarters. I couldn't believe that this was really happening to me. I, out of all the many people who had sent in applications, had been picked as one of the lucky seven young numismatists to go on an A.N.A. scholarship to its summer seminar in Colorado Springs, Colorado. The few remaining weeks passed quickly, until it was finally 9:00 a.m., July 8th, the time to depart.

According to my instructions, I was to go to the A.N.A. headquarters, register and pick-up a registration pamphlet containing all the information about the seminar and other college events that I would need. I was supposed to spend only a little time at the headquarters, but once you walk in, you'll not walk out for many hours. When standing in front of the building, its looks like a television picture tube with white columns to the left and right of a giant oval which serves as the entrance.

Directly inside is the administrative hall. Here can be bought the many different medals or memberships that the A.N.A. sells. To the left of the hall are the many different offices and the area where the "Numismatist" is published. To the right, is the museum with its many spacious and attractive displays, which is the largest numismatic library in the world. Either way, the headquarters offers a numismatic experience that is unforgettable.

On Monday, all the seminars 134 students started their classes er a brief meeting on instructions and introductions. Since I had ding class, I went to a building called Olin No. 1. The grading ss was instructed by Richard Long, the curator of the A.N.A. seum. Mr. Long gave a very interesting lecture class where the dents could ask their questions or voice their opinions at any- e. Because of this, our subject would usually start out on grading l, as in one class, eventually get onto heating systems that can t coins or some other subject. As the class was so interesting, ead of the four hours that most of the seminar's students had day, our class lasted seven or eight hours.

Tuesday was highlighted by a tour of the Denver Mint. This tour ld be fascinating even to a non-collector. It is amazing to see the usands of flans being weighed, annealed, struck and bagged. And errors! We saw a cent that had been stuck in the press so that over other cents were struck onto it. It was at least four inches high seven inches around its curved sides. And to think that a mint ployee came over and threw this ten-to-twenty thousand dollar back into the furnace. Howard Johnson, Chief of the Mint oratories in the United States, gave a very interesting talk on dnesday. The talk was mainly about how the "Mint Labs" work was followed by a question and answer period. Once again, a talk t had been scheduled for two hours turned out to be one lasting for l over double time.

Thursday and Friday were regular days starting with breakfast and ss, and ending in either an hour or two of ping-pong, pool shooting, d playing, or just talk. Finally Saturday regretfully arrived. This, last day of the seminar, was marked by the presentation of our tificates of Participation by John Jay Pittman; and by an enjoyable to Crippled Creek, a nearby ghost town and mine. And before I w it, the seminar had ended. I was soon on the airplane, going home. But as I looked from the small window on the plane, onto Colorado rings, I realized that I had left many new friends there and that I ld return next year, if I could.

hope that you can have the same chance to go to the seminar. ou can, Go! You won't regret it.

SECOND CHANGES.—We all have to learn, in one way or another, that neither men nor boys get *second* chances in this world. We all get *new* chances till the end of our lives, but not second chances in the same set of circumstances; and the great difference between one person and another is, how he takes hold of and uses his first chance, and how he takes his fall if it is scored against him.—*Thomas Hughes.*

TOWER OF LONDON

by Peggy E. Borgolte F.R.N.S. - N.L.G.

The official title of the most popular tourist attraction in all of England is "The Royal Palace and Fortress of London." To blue-bloods and red-bloods alike it's simply the "Tower of London."

It is a rare day when a tourist doesn't approach a Yeoman Warder and ask, "Which is the Bloody tower?" Losing the English cool, an occasional Yeoman has been known to reply, "It's all the Bloody tower!"

While there is a Bloody Tower there, it is just one in the complex collectively known as the Tower of London. In all, 22 individually named towers make up the stone-and-brick fortress that houses so much history. The towers are generally clustered in two concentric rings that spread over an 18 acre site near the center of modern London.

They are surrounded by a 100 foot wide grassy depression that was formerly a moat. Queen Victoria ordered it drained dry in 1843. It is a bloody past the Tower of London has.

Its roster of inmates has included pretenders and princes, traitors and murderers, royal favorites who disagreed with their sovereign or were too dangerously popular, religious martyrs and political upstarts, kings and queens and princesses. Whatever their rank or crime, few prisoners ever regained their freedom. Most left their cells only to walk to the headman's block on Tower Hill. The ladies especially. It seems they always came to a sudden and definite end.

At the center of the enclave stands the oldest and finest building, the White Tower, or Keep, began by William the Conqueror in 1078 for the "protection" of the city. Or so he said.

Looking down upon a city whose buildings were then mostly of wood, the nearly square structure of pale colored limestone and coarse ragstone soars to a height of 90 feet and measures 107 feet by 118 feet. Massive buttresses rise from ground to battlements to support its 15 foot thick walls. Four turrets, one circular, the others square, top the corners and wear metal bonnets capped with weather vanes bearing the royal coat of arms.

The entire thing was whitewashed some time in the 13th century. Though the White Tower no longer is white, the memory lingers on as the name for William's original effort at mass psychology.

Subsequent rulers expanded the fortress' defenses over the centuries, another tower here, more buttresses there, walls everywhere. The result today is an awesome symbol of England's ancient heritage, an architectural phenomenon that has served many purposes in its time.

Every monarch down to James I (1603-1625) used the Tower as a royal residence. It was an observatory until the one at Greenwich was built in 1675, a mint until the establishment of the Royal Mint in 1810, and the site until 1834 of the royal menagerie, predecessor of the London Zoo.

The Tower of London's reputation rests on grimness rather than grandeur, having imprinted itself on the popular imagination in the blackest hues, chiefly as a prison.

A railed space in Trinity Square, just outside the fortress wall, mmemorates where the first scaffold was erected on Tower Hill, d where much of the sadness took place. Here, Sir Thomas More, well as countless other notables; Thomas Cromwell, Lord Guild- d Dudley, Simon Fraser and Lord Lovat; felt the ax.

Lord Lovat has the dubious distinction of being the last person e decapitated at the Tower, in fact, the last person to be beheaded where in England. However reminders of the Towers gruesome t still echo from every nook and cranny.

Beneath Gothic windows on the second floor of Wakefield Tower he chamber where Henry VI reputedly was murdered while at yer. Salt Tower is noted for the many inscriptions, some pain- y heartbreaking, scratched on its walls by doomed prisoners. en's House is a timber framed structure where Henry VIII ed up his second wife, Anne Boleyn, and sentenced her to death.

Incongruously, the last person ever to be imprisoned at the ver, Deputy Fuhrer Rudolf Hess, following his flight from many in 1941 also spent four days at Queen's House before g moved to other quarters.

Traitor's Gate, under the half timbered St. Thomas' Tower on southern edge of the complex, is about 50 feet from the Thames y. But in Tudor times, its stairs led directly into the river, and y prisoners charged with treason arrived by barge to begin sentences. The future Elizabeth I, while still a princess, de- ed here to spend sometime in the Tower at the "invitation" of alf-sister, the "Bloody" Queen Mary. A grim place in the White er is its notorious Dungeon of Little Ease, a name that means tly what it implies. The cell is so small, only four feet square.

Another basement dungeon in the White Tower contains a tly display of instruments of torture, beheading axes, execution s, thumbscrews, iron collars, a rack, and the "Scavenger's hter," an especially nasty device that crushed a body. The was quite popular. One man who felt the full strain of its stretch Guy Fawks, a leader in the Gunpowder Plot in the 17th century, rding to rumor, he reportedly was 2½ inches "taller" than nature made him, when the ordeal ended.

The most infamous building in the whole infamous ensemble its name, ("The Bloody Tower,") because of one of England's st murders. According to many historians, this is where the le Princes", Edward V and his brother, the Duke of York, murdered in 1483 by order of their ambitious uncle, Richard ect. So many dirty deeds have occurred behind these walls o one has ever been able to prove Richard as the guilty culprit. enturies later, two children's skeletons assumed to be the es' were found concealed under a stairway in the White Tower nterred with full honors in Westminster Abbey.

Despite all this the "Bloody Tower" was not uncomfortable, as go. Sir Walter Raleigh conducted scientific experiments, re- visitors, and had numerous servants during the nearly two es he awaited the inevitable day of reckoning. His portrait angs over the fireplace in the chamber where he wrote a monu- al history of the world.

An area appropriately called Tower Green lies within the fortress' inner walls. The only thing that mars this otherwise peaceful patch of greenery is a small plot paved with granite to mark the spot where seven - including Lady Jane Grey, the Earl of Essex, two of Henry VIII's wives, Catherine Howard and Anne Boleyn - climbed the scaffold reserved for private executions. All except Anne were beheaded with the ax. She chose the sword instead.

Not all is infamy. There is grandeur at the Tower of London, for the Crown Jewels are guarded here also.

Like the Crown Jewels, the Tower of London has, above all else, that remarkable quality of being The Real Thing.

For here, tradition - which makes England so fascinating and timeless endures: In the Tudor garb of the halberd-bearing Yeoman Warders. In the firing of salutes when Parliament convenes or a royal infant is born. And in the tame ravens that hop playfully about Tower Green.

Tradition says that the day there are no ravens, the Tower, or Britain, or both, will collapse. No one is about to take the chance. Each raven gets a 30-cent ration of horsemeat daily, and its wings clipped periodically.

But especially at 10 O'clock every night when the gates of the Tower are locked in the ancient Ceremony of the Keys, it seems as if nothing has changed at all - or ever will.

At five minutes before the hour, the Chief Yeoman Warder, in long red cloak and Tudor bonnet, carrying a lantern in which a tallow candle burns, marches out from the Tower's inner ward with the keys of the fortress in his hand. He calls: "An escort for the Keys!" Four armed soldiers of the garrison fall into step beside him, and, together, they cross over the causeway to the main entrance gate.

The gate is locked. The escort marches back in the darkness to Byward Tower in the outer ward. There is a clanking of metal as its gates are slammed shut and the bolts shot home. As the Chief Yeoman and his escort approach the Bloody Tower, the sentry on guard comes forward with the challenge; "Halt, who goes there?"

The Chief Yeoman replies, as his predecessors have replied every night for centuries: "The Keys." - "Whose Keys?" - "Queen Elizabeth's Keys." The sentry presents arms. the Chief Yeoman doffs his bonnet, and cries out loud and clear: "God preserve Queen Elizabeth!"

The entire guard solemnly responds: "Amen!" The bugler blows the Last Post. The clock strikes 10.

After that, no one gets into the Tower except the Queen and the Lord Mayor of London - and then only by special password, changed daily.

BREAKING BARRIERS — This, then, is Christianity: to smash the barriers and get next to your fellowman.

—John T. Faris.

His friend's father was a pharmicist who was active in numismatics at that time, had an extensive collection, and contributed much valuable knowledge and encouragement. Although a large portion of his early collection was built from coins in circulation (his father, a banker, brought a bag of

oins home many evenings for inspection), he did purchase several incoln cents from a dealer in Pasadena in the middle 40's, at prices ubstantially below today's market. He was the first in his area to eceive the coin collecting merit badge with the Boy Scouts.

His present numismatic interests lie chiefly with the areas of northern urope, concentrating on Russia, Finland, Estonia, Latvia, and Lithuia. His primary interest in United States coins favors turban head alf dollars. In the past he has been an active exhibitor at many nventions and shows, and is a past president of the Convention of ternational Numismatics. In 1971, he received the first place N.A.S.C. terary Award for his article "Esti Vabariik."
